

CivilianCyber Workforce Solutions

The Workforce Innovation Network (WIN)
Engage Candidates and Employees by Optimizing Critical Thinking

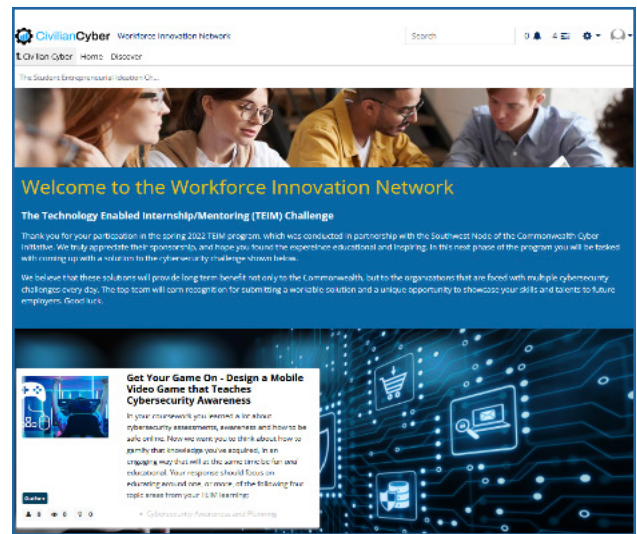

The Workforce Innovation Network (WIN) platform was created to allow government, academia, and private sector contributors to solve challenges that provide incremental, adjacent, and transformational innovations. The management platform is a secure, cloud-based platform that can be easily configured to drive user engagement, challenge participation and ideation collaboration as well as support corporate assessment or training programs.

The platform can be accessed as either a stand-alone application or as an integral component of the CivilianCyber Automated Workforce Engagement, Smart Assessment & Matching (AWESAM) suite of workforce development technologies, provides tools to grow existing or new talent to meet the demanding needs or high demand workforce development.

The WIN platform has been utilized to support multiple use cases for clients as diverse as the Virginia Commonwealth Cyber Initiative, The US Army Night Vision Labs, USARPAC – Hawaii. The Maryland Center for Construction and Innovation, the Virginia Department of Labor as well as many leading national colleges and universities.

Over the past two years CivilianCyber has developed multiple industry leading workforce development solutions that have been recognized by state and national organizations such as the Virginia Department of Labor and Industry, the US Department of Labor, as well as several leading public and private workforce intermediary organizations.
